This table highlights the importance of being consistent with your use of keywords. To improve the chance of ranking high in search results with a specific keyword, you should use the most important keywords consistently in your content, title, description, H1 title, internal links anchor text and backlinks anchor text.

Page Level SEO Recommendations

High Priority

Your social share count is low. You can improve the rank of your site by creating high-quality content that people want to consume and share.

You need to increase your back links, you should consider creating an email outreach program.

Medium Priority

Title tags are an important on-page factor for SEO. Your title tags should contain fewer than 70 characters. This is the limit Google displays in search results.

Low Priority

We noticed that you have heading tags that are too long or too short. Its best to keep your heading tags between 15 and 65 characters.

The majority of the keywords are not found in the site title. Make sure you place your most descriptive keywords in the site title.

The majority of the keywords are not found in the meta description. Make sure you place your most descriptive keywords in the meta description.
